

Vivere^{beta}

Your own personal assistant

Evaluation Report

Description

Vivere is a personal health assistant who is be able to:

- Help any user manage his appointments to the doctor or the chemist
- Store and display patient's appointment history
- Remind the user to take his medication using classic and original methods.
- Remind the user periodically regarding medical examinations
- Keep the user up-to-date with his health obligations
- Gain a good habit or break a bad one

We aim to create an intelligent, responsible and user-friendly health assistant that will motivate the user to be more passionate about taking care of his health state.

We need your honest feedback. Please [download](#) and **install** the application in **.apk** and answer the questions below.

How to use the app in beta mode?

Note that there is only one user and it's called "John". So you are "John" and you can add or delete any exam, medication, appointments etc.

ANY CHANGES YOU MAKE WILL BE VISIBLE IN ALL THE BETA TESTERS. Except habit feature that is unique in every device.

Also note that there are only 1 Doctor and 1 Chemist in the database:

Doctor: Dr Steven Strange

Chemist: Dr Dexter Morgan
